

We are sonible, a young tech company based in Graz (Austria) developing soft and hardware tools for audio production. Our multidisciplinary team is now searching for support in the field of software engineering and programming for creating the future of music software at sonible.

Dev-Ops Engineer

20-30h/week

Your Role

- You conceptualize, develop and implement CI/CD workflows for C++ audio plugin products and more.
- You maintain and evolve a multi-platform build toolchain (MacOS, Windows, Linux) and its dependencies.
- You manage on-site build infrastructure as well as cloud facilities.
- You help to enhance Quality Assurance by developing and implementing automated test scenarios on dedicated test infrastructure.

Your Profile

- You have advanced programming skills in multiple languages such as C++ and Python and experience in managing software projects with CMake.
- You have intensively worked with CI/CD software like Jenkins, Hudson or TeamCity as well as dependency/package management systems like Conan or CPM.
- You are familiar with code signing, certificate handling and creation of application installers
- You are experienced in working with other programmers in source code management systems like Git.
- You have a degree in Computer Science or a related field. Working knowledge or exposure to DSP and audio signal processing algorithms is a plus.
- It would be a nice benefit if you are familiar with existing audio production technologies and enjoy working creatively with music.

Our Offer

- We offer a flexible schedule and the possibility for remote work.
- We are a small yet powerful team and appreciate a good, amicable working climate.
- We enjoy work & life – we even have a beer tap in our office for the occasional after work come together.
- Become part of a young, growing company in the international music industry and help us shape the future of audio production!

Start

As soon as possible

Working hours

20-30h/week

Location

Graz (central location) or remote

Salary

€45.000,- per year for full-time employment (38,5h/week)
according to the IT Collective Agreement.

Overpayment depending on your qualifications and experience.

Interested? Send your CV and maybe some links to your past projects to jobs@sonible.com.
