

## **sonible's pure:bundle is a comprehensive suite of AI-powered, straightforward audio processing plug-ins**

**sonible offers the pure:bundle, a complete collection of intelligent audio plug-ins designed to deliver professional sounding results with ultimate ease of use. Combining cutting-edge AI-powered processing with a set of a few intuitive controls for creators to significantly improve music mixes, demos and podcasts in not time.**

The pure:bundle includes pure:limit, pure:comp, pure:verb, pure:EQ, pure:deess, and pure:unmask – a comprehensive toolkit for effortless mixing. Each plug-in uses sonible's award-winning smart technology to listen to your audio and automatically apply a tailored processing strategy, saving time while maintaining creative control over the desired sound.

This comprehensive suite embodies sonible's commitment to innovation and breaking down technical barriers. Whether fine-tuning vocals, balancing instruments, or finalizing a full mix, the pure:series plug-ins ensure transparent, musical results – powered by AI, perfected by ears.

### **About sonible**

From mixing engineers, FOH engineers, and music producers to AI experts, software developers, DJs and musicians – the sonible team is an eclectic mix of highly skilled engineers and creative individuals. We put all of our vast audio experience and user-oriented focus into developing AI-assisted audio plug-ins, designing and implementing 3D audio systems and building audio hardware – sound in all its complexity is our passion. We transform technological possibilities into tools for audio production that are characterized by their incredible sound, intuitive interfaces and workflow-enhancing features – in short, tools that inspire creativity.
